

Do You Know?

. . . that California law requires children, regardless of age, to ride in a safety seat or booster if they are too small to wear a safety belt properly?

. . . that most parents use safety seats incorrectly, even though they think they are using them correctly?

. . . that more than 20 million safety seats have been recalled and that many of them have not been repaired?

. . . if you have checked the *most recent* recall list?

. . . that a safety belt shoulder strap should *not* be placed under the arm? And why not?

. . . when a child is old enough to ride forward facing in the car?

. . . how to properly transport physically challenged infants, children, and adults in vehicles?

. . what a tether strap is and why it is important?

These are a few of the essential points covered in this workshop, which prepares professionals and community volunteers to prevent injuries in traffic collisions, the #1 killer andcrippler of children and adults under 35 years of age.

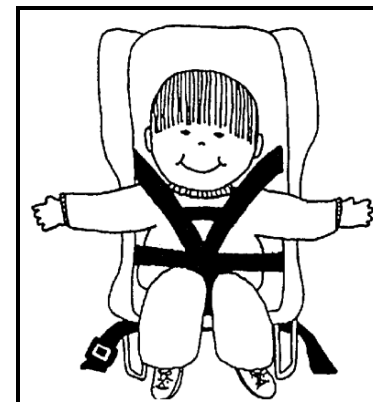

More than 7000 satisfied participants have completed SafetyBeltSafe U.S.A. Educator Workshop training. The nationally recognized curriculum and materials are updated frequently to include the most current information on technology, legislation, regulation, and programs. It is recommended that participants attend the course at least every two years.

Return Service Requested

CHILD PASSENGER SAFETY TRAINING COURSE by *SafetyBeltSafe U.S.A.*

A hands-on learning experience for health care providers and educators, social workers, emergency responders, law enforcement officers, childbirth and parenting educators, transportation coordinators, safety officers, teachers, retailers, and community volunteers.

Educator Workshop (Part I)

Thursday, April 5, 2012

8:15-4:30

Altadena Community Center

Altadena, California

Safety Seat Checkup (Part II)

Saturday, April 21, 2012

Petersen Automotive Museum

Los Angeles, California

(10:00 A.M. to 2:00 P.M. for public)

Sponsors: California Office of Traffic Safety
Pomona Police Department

Funding for this program was provided by a grant from the California Office of Traffic Safety through the National Highway Traffic Safety Administration.

Objectives

At the completion of the Educator Workshop, the participant will be able to:

1. Describe the roles of health and safety professionals in reducing injuries and deaths of children from vehicle crashes.
2. Identify the incidence of death in childhood from vehicle crashes and the effectiveness rate of correct restraint use.
3. List the four basic types of child safety restraints and the appropriate size and age of children for each type.
4. List and explain the main criteria that should be used in choosing a safety seat.
5. Identify at least three essential components of a community program.
6. List at least five activities that health and safety professionals might use to promote child passenger safety.
7. Identify belt systems in vehicles and describe the meaning of LATCH.

Credits for Continuing Education

This course is approved for 6 contact hours by the California Board of Registered Nursing (Provider #00261) and for 3 CEUs for Certified Technicians and Instructors.

This course is recommended as preparation for the national Standardized Training Course to become a Certified Technician.

Funding for this program was provided by a grant from the California Office of Traffic Safety through the National Highway Traffic Safety Administration.

SafetyBeltSafe U.S.A. Faculty

Stephanie M. Tombrello, LCSW, CPSTI,
Executive Director
Team of nationally Certified CPS Instructors
