

Why SafetyBeltSafe U.S.A.?

Our training workshops are a hands-on learning experience for healthcare providers and educators, nurses, social workers, emergency responders, law enforcement officers, childbirth and parenting educators, transportation coordinators, safety officers, teachers, retailers, and community volunteers.

This workshop also is recommended as preparation for the national Standardized Training Course to become a Certified Child Passenger Safety Technician.

SafetyBeltSafe U.S.A., founded in 1980, is the national non-profit solely devoted to increasing child passenger safety through the correct, consistent use of safety seats and belts and has been providing training since 1980.

Credits for Continuing Education

CPS Technicians & Instructors: This course is approved for 4 Continuing Education Units toward recertification.

Nurses: UCLA Medical Center is an approved provider by the California Board of Registered Nursing. This course is approved for 7 contact hours of continuing education (CE) credits.

Funding for this program is provided by the California Office of Traffic Safety through the National Highway Traffic Safety Administration.

Did You Know?

... that California law requires children, regardless of age, to ride in a safety seat or booster if the safety belt doesn't fit properly?

... that most parents use safety seats incorrectly, even though they think they are using them correctly?

... that more than 20 million safety seats have been recalled and that many of them have not been repaired?

... if you have checked the most recent recall list?

... that a safety belt shoulder strap should not be placed under the arm? And why not?

... when a child is old enough to ride forward facing in the car and how California law has changed?

... how to properly transport physically challenged infants, children, and adults in vehicles?

... what a tether strap is and why it is very important?

These are a few of the essential points covered in this workshop, which prepares professionals and community volunteers to prevent injuries in traffic collisions, the #1 cause of death and disability for children and adults 35 years of age and under.

Our Goal:

To increase health and safety professionals' knowledge of: proper child safety seat usage, to reduce the incidence of death and injury in childhood from motor vehicle crashes, and to enhance professionals' roles in the community in reducing those deaths and injuries.

More than 7300 satisfied participants have completed this nationally recognized curriculum. It is recommended that participants attend the course at least every two years.
