

Forward-Facing-Only Safety Seats and Harnesses

All models listed have a 5-point harness and a harness adjuster accessible from the front. See table for minimum and maximum weight. Note: SafetyBeltSafe U.S.A. recommends that children ride rear facing until at least age two.

Some of the products listed below are **combination seats**, which may be used with the harness until the child reaches the maximum weight and/or the shoulders are above the top strap slots. When the harness is removed, the seat is used as a belt-positioning booster. Do not use as a booster unless the lap belt is touching top of child's thighs and the shoulder belt is touching the shoulder and chest. Caution: Some combination seats have a belt guide that, when the seat is used as a booster, prevents the shoulder belt from retracting properly to take out the slack if child leans forward. *Must be supported by vehicle seatback.

Manufacturer	Model Name	Wt limit w/ harness	Wt limit w/o harness	Other
Britax	Frontier	25-80	40-100	Combination seat
Britax	Regent	22-80	no
